

Evidence-Based Medicine

Contents

Purpose and procedure	130	Review: tricyclic antidepressants, capsaicin, gabapentin, and oxycodone are effective for postherpetic neuralgia	147
Additional articles abstracted in ACP Journal Club	131	Review: home visiting with multidimensional assessment and multiple visits is effective in low risk elderly people	148
EBM notebook		Sertraline maintenance treatment reduced relapse and dropouts in post-traumatic stress disorder	149
Practice corner: using clinical prediction rules.....	132	Review: brief interventions reduce drinking in patients not seeking treatment	150
Resource review	135	A brief intervention reduced alcohol drinking for up to 48 months in problem drinkers	151
Therapeutics		A normal calcium, low protein, low salt diet reduced recurrence of renal stones over 5 years	152
Oestrogen plus progestogen increased coronary heart disease and breast cancer events in postmenopausal women.....	137	Physiotherapy or a wait and see policy were the best options for lateral epicondylitis at 1 year	153
Review: postmenopausal oestrogen replacement therapy increases the risk for venous thromboembolism	138	Bed rest, physiotherapy, and continuation of activities of daily living were equally effective for sciatica	154
A lifestyle intervention or metformin prevented or delayed the onset of type 2 diabetes in people at risk	139	Review: antiemetic drugs reduce nausea in early pregnancy	155
Warfarin combined with low dose aspirin in myocardial infarction did not provide clinical benefit beyond that of aspirin alone	140	Telephone-based peer support increased the duration of breast feeding in primiparous mothers	156
Review: angiotensin receptor blockers do not reduce mortality or hospital admission rates in heart failure	141	Clonidine and methylphenidate were effective for attention deficit hyperactivity disorder in children with comorbid tics	157
Review: n-3 polyunsaturated fatty acids reduce fatal myocardial infarction, sudden death, and overall mortality in coronary artery disease	142	Pharmacist review changed more repeat prescriptions for elderly patients than usual general practice review	158
Parental education and guided self management of asthma or wheeze in pre-school children was not effective	143	Diagnosis	
Review: inhaled corticosteroids for asthma or chronic obstructive pulmonary disease do not increase bone loss ...	144	Review: questionnaires for detecting clinical depression in primary care have similar diagnostic accuracy.....	159
Review: nedocromil sodium decreases airflow reduction and recovery time in exercise induced bronchoconstriction	145	Aetiology	
Review: β_2 agonists are ineffective but increase adverse effects in acute bronchitis without underlying pulmonary disease	146	Increased plasma total homocysteine levels increased the risk for dementia in the elderly	160
